

Mystic Stars

By Lasha Seniuk – www.mysticstars.net

ARIES (March 21-April 20). Yesterday's financial promises may soon demand clarification. Older relatives or key officials may ask for detailed records and lengthy explanations. Money and home plans will prove accurate. Don't avoid controversy but carefully consider all options.

TAURUS (April 21-May 20). New relationships will bring positive social and romantic changes. Long-term friends may be sensitive to small comments or late reversals. Offer reliable promises and detailed personal information; your reaction will set the emotional tone for much of 2007.

GEMINI (May 21-June 21). Private comments and social disagreements will require a fast response. Loved ones may be moody, insightful or introspective. Ask gently probing questions and watch for new levels of sensuality or romantic awareness to arrive.

CANCER (June 22-July 22). Workplace negotiations and subtle comments from authority figures may be misleading. Areas affected are short-term contracts, special assignments or revised paperwork.

Instructions may be unworkable. Ask for clarity and wait for new ideas.

LEO (July 23-Aug. 22). Friends or relatives may ask for detailed social advice. If so, expect romantic triangles or distant relationships to be a strong concern. This year, many Leos will feel pressured to redefine key business partnerships. Authority figures will eventually resolve conflicting promises or failed agreements. Remain open.

VIRGO (Aug. 23-Sept. 22). Delicate business or financial discussions are best avoided; expect loved ones or older officials to be unresponsive or critical of new decisions. Areas affected are money agreements, private loans or short-term work assignments. Remain patient. Romantic triangles and new friendships are highlighted throughout summer.

LIBRA (Sept. 23-Oct. 23). Potential friends and lovers will be attracted to your social charm or emotional style. Confidence and humor may soon be delightful themes in new relationships; watch for group events and fresh introductions to be captivating and

worthwhile. Workplace routines may dramatically change.

SCORPIO (Oct. 24-Nov. 22). Personal spending and daily money habits will need to be re-evaluated. Unexpected home expenses or revised payments may be accented. Financial strain will be brief, but not to worry. Do, however, plan for added repairs, new obligations or sudden large purchases.

SAGITTARIUS (Nov. 23-Dec. 21). For many Sagittarians, career dreams and lost ambitions will return. Pay special attention to practical planning, funding or revitalized business proposals. Don't hold back: 2007 is the right time to adopt an outgoing attitude toward workplace improvement and new sources of income.

CAPRICORN (Dec. 22-Jan. 20). A previously confident colleague may ask for guidance or support. Be diplomatic and provide a detailed description of new instructions. Many Capricorns will be offered a revised work role or new job title. Stay balanced: political tensions may be unusually high.

AQUARIUS (Jan. 21-Feb. 19). Love relationships will steadily expand to include new

goals or unique family gatherings. Group dynamics and social politics will be controversial but delightful: use this time to outline fresh ideas and creative home improvements. A past financial or business contract demands completion.

PISCES (Feb. 20-March 20). Carefully study all facts, numbers and documents. Improved policies or last-minute business changes will require an almost constant effort. Avoid appearing disinterested: authority figures are highly motivated to correct yesterday's mistakes. Social and family obligations will steadily intensify.

IF YOUR BIRTHDAY IS THIS MONTH: New friends will demand extra attention. Planetary alignments suggest that family members and romantic partners may feel mildly critical of social improvements or changing group dynamics. Although minor tensions exist, this is not the right time to avoid new relationships. Loved ones will also opt for emotional expansion: remain patient and encourage optimism.
